Meat Manufacturing ERP V5.1.1

An Enterprise Product By
Bito Technologies Private Limited

www.bitotechnologies.com

Hello!

We are Bito Technologies

We are presenting
An ERP Solution for Meat Manufacturing Industry.
Our Products is Stable and has capability of handling
large scale data. It manages almost all operations in a
single information system.

To Know More Visit Us

Manufacturing ERP V5.1.1

Let's start with one of the most Robust ERP Solution for Manufacturing Industry

Why Meet Industry needs an ERP Solution?

1

To Reduce Cost of Operations

Most of the organizations face following failures due to which a lot of money wasted in Manufacturing unit operations. This can be saved through an ERP System.

Start new production for order even when we have stock available in stores

Producing Wrong brands in made to stock even other brands are more routine export

No Data availability of actual stock.

Takes a lot of time to complete order and Export.

Mismanagement of Stock bring a lot of cost of in internal transfer.

2

Planning & Forecasting

A perfect planning or forecasting can be done only if you have a perfectly arranged data for analysis. A lot of Money, Energy and Man Power can be saved when all action done based on proper planning.

3

Standardization of Operations

One of the major problem for this industry is mostly there is no organized business process. People work based on their learnings or self decision. Through ERP a Synchronized system can be generated and this brings more efficiency in whole organization.

Key Benefits

Bito Technologies

Single Application All Information
This single Application has all the modules including all Departments other than production. So few clicks will able to bring all crucial information about organization.

Cloud Ready Application
This is a cloud ready application and can be installed in both Server as well as Cloud.

Easy Data Management
Save a lot of time as it is far easy to manage data then excel or any stand alone applications.

Business process Automation
One by one all process of organization get standardized through system after implementation of ERP.

Best Monitoring Tool
Through ERP Data can be managed easily and monitoring becomes a function of simple clicks. Besides that get automatic alerts.
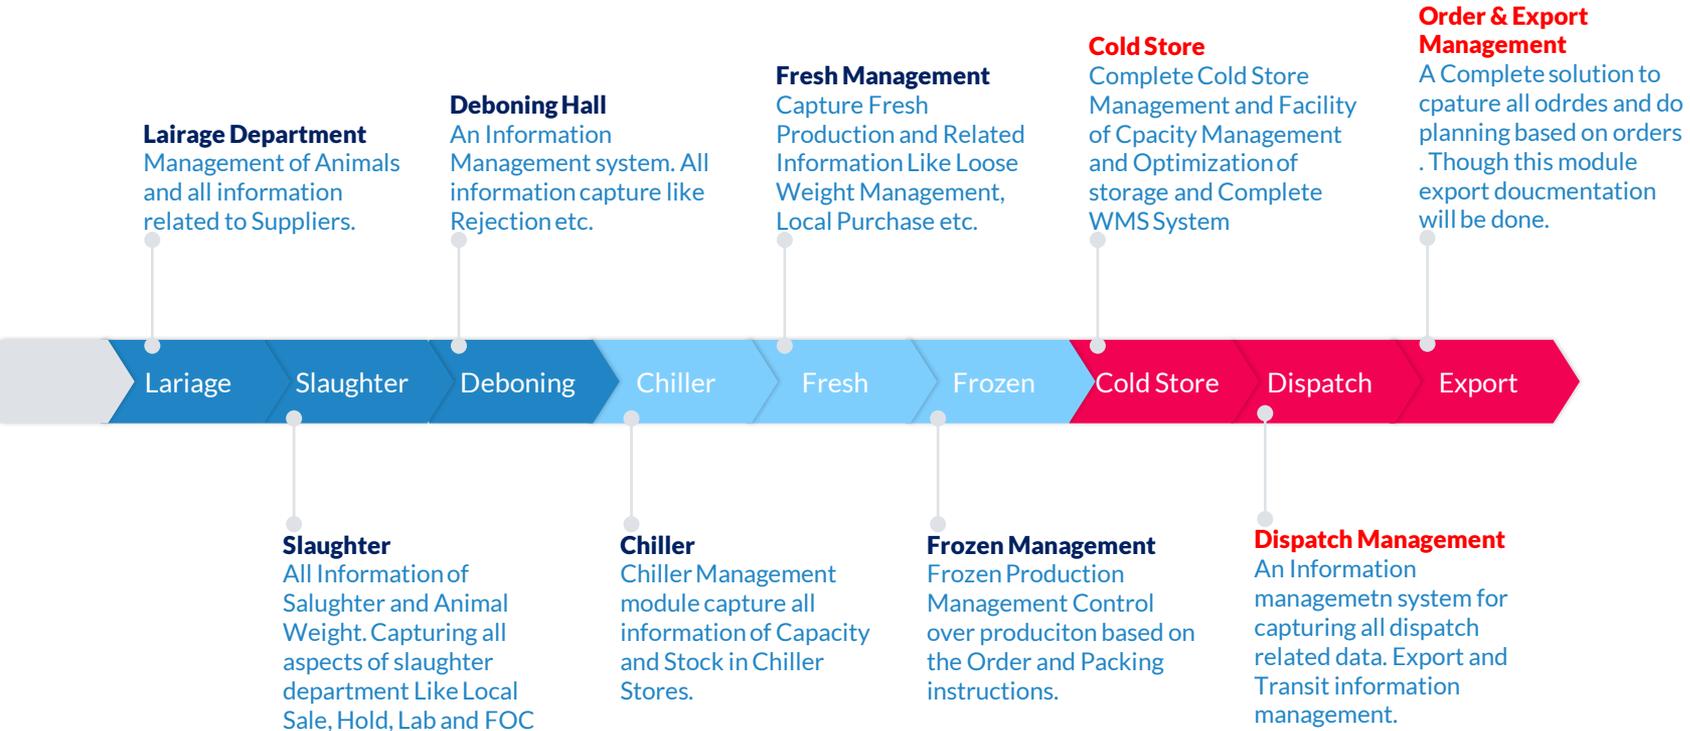

DSS Reporting
DSS Reports is a future use of the ERP. When you can generate trend based reports, planning reports and forecasting reports.

Production Automation

Bito Technologies

Lairage Department
Management of Animals and all information related to Suppliers.

Deboning Hall
An Information Management system. All information capture like Rejection etc.

Fresh Management
Capture Fresh Production and Related Information Like Loose Weight Management, Local Purchase etc.

Cold Store
Complete Cold Store Management and Facility of Cpacity Management and Optimization of storage and Complete WMS System

Order & Export Management
A Complete solution to cpature all odrdes and do planning based on orders . Though this module export doucmentation will be done.

| Lariage | Slaughter | Deboning | Chiller | Fresh | Frozen | Cold Store | Dispatch | Export |

Slaughter
All Information of Salughter and Animal Weight. Capturing all aspects of slaughter department Like Local Sale, Hold, Lab and FOC

Chiller
Chiller Management module capture all information of Capacity and Stock in Chiller Stores.

Frozen Management
Frozen Production Management Control over produciton based on the Order and Packing instructions.

Dispatch Management
An Information managemetn system for capturing all dispatch related data. Export and Transit information management.

ERP Modules & Sub modules Summary

Bito Technologies

Production Modules			
	Lairage Management	Slaughtering Department	Chiller Management
	Deboning Management	Fresh Management	Frozen Management
	Cold Store Management	Dispatch Management	Order/Export Management
	Equipment Management	Accessories Management	Certifications/Delegation Documentation
	Item/Material Management	Local Sale Management	Gate Pass Security Management Civil
	Department Automation	Energy & Resource Management	

Utility Applications			
	Entity Management	Document Management	Calendar Management
	Task Management	Communication Management	FTS (File Tracking System)
	Medial Library Reservoir		

Additional ERP Modules			
	HR Management	Accounts Management	Inventory Management
	Purchase Management	Transport/ Logistics Management	Legal Department
	Civil Department	Electrical Department	IT Asset Management
	Marketing	Sales Automation	

Bito Technologies

Production Management

Complete End to End Production

Lariage Department
(Complete Information Management)
Slaughtering Department
(Complete Information Management and capturing of Animal weight)
Chiller Management
(Complete Information Management of Capacity & Status)
Deboning Department
(All activity Data Capture)
Frozen Area Management
(Complete Information Management)
Cold Store Management
(Complete stock Management and Capture all store transactions)
Dispatch Management
(All Dispatch Planing, Export, shift Transactions and Documentation)

Inventory /Purchase Management

Inventory of Other than Finished Goods and Purhcase Automation Process. Departments Covered are as mentioned below

Purchase Department
(Complete Indent & Tendering Process Automation)
Factory Store Management

Sales, CRM & Marketing

Modules for CRM & Sales Business Process Automation

Entity Management
(For All centralized organizations and contact List)
Marketing
(Campaign Manageemnt & Information Capture)
Sales Department
(Planning, Lead Management)

HR Management

A Complete HR Solution as described below

HR Configuration
(Configuration & Customization)
Recruitment Management
(Recruitment Information Management)
Employee MIS
(Employee MIS Data Management)
Employee Documentation
(Employee Document Management)
Employee Lifecycle Management
(All Employee Job Information)
Employee Payroll Management
(Payroll Management Features)
Employee Exit Management
(Exit Information & documentation)
Employee HR Training Management
(Training and Grooming)

Factory Operations & Infrastructure Management

Other Modules related to Factory Operations.

Refrigeration Department
Documents & Media Management
Certification Management
Asset Management
Accessories Management
(Packaging Material)

Utility Modules

Following Utility Modules

Gate Pass Management
Entity Management
(For All centralized organizations and contact List)

Logistics

Management of Logisttics Information.

International Logistcs status
(information capturing through CnF Organizations)
National Logistics Management
(Facility of All Data Capture including GPS Location and Tracing of Vehicles)
Transport Management
(Facility of Vehicle management, Driver information Management, Vehicle Service and Maintenance information Management)

Finance & Accounting

Complete Accounting Solution
Double Accounting System as Per Indian Accounting Standards
Accounting Reports
Order Wise Accounting Facility

Monitoring, DSS, Planning & Support System

One of Crucial Part of the ERP

Monitoring and Alert Management
(Provide information About day to day activities of factories and give auto alerts)
Management Reports
(For all kinf of combined reports and Data Reports)
DSS Reports
(Graphical and Analyiss reports for Descision Support System)

Bito Technologies

Production ERP

How Right Information Leads to Right Growth

Production Segment

Lairage Department

Bito Technologies

Information Management

We Capture following information

Supplier Gate Pass and delivery Information
Animal Day wise Tagging
Animal Ante Mortem Details
Animal Post Mortem Details
Emergency Animal Details
Hide Rejection Data
Death Data

Reports

Following Reports in Module

Supplier Wise MIS
Animal Tagging Sequence
Ante Mortem Report
Post Mortem Report
Emergency Animal MIS
Death Animal MIS
Hide Rejection MIS

Managemet Reports

Month wise trend of Animal Receipt
Supplier wise Yearly Capacity
Average Death Ratio
Average Emergency and Rejection Ratio

Automation

Barcode based Animal Tagging (For all process including Receipt, Slaughtering, AM, PM, Death etc.)

Production Segment
Slaughter Department

Bito Technologies

Information Management

We Capture following information

Sequence of Slaughtering
Capture Weight
Local Sale Data
FOC Information
Animal Hold/Release Info
Lab Information Management

Reports

Following Reports in Module

Salughter Sequence
Supplier Wise Patti Report
Supplier Billing Summary

Local sale Report
Local Sale MIS
Item Wise sale MIS
Local Agency Sale Pricing and
Consolidated Inforamtion

Managemet Reports

Month wise trend of Salughter
Slaughtering Capacity and Actual
Average Animal Costing
Average Animal Weight
Local Sale DSS

Automation

Weighing Scale Direct Entry to System (Application will capture weight based on animal slaughter sequence)

Production Segment
Chiller Department

Bito Technologies

Information Management

We Capture following information

Chiller Store Entry
Chiller Store Out

Reports

Following Reports in Module

Chiller Capacity Status
Chiller Entry and Out MIS
Chiller Tempreature Log

Managemet Reports

Average utilization of Chiller Capcity
Chiller Cost Effectiveness

Production Segment
Deboning Department

Information Management

We Capture following information

Deboning Summary for Deligation
Deboning Weight Wise Processing Data
Rejection Information
Lab Information

Reports

Following Reports in Module

Deboning Summary
Deboning Delegation Report
Deboning MIS
Rejection MIS

Bito Technologies

Production Segment

Fresh Department

Bito Technologies

Information Management

We Capture following information

Fresh production Item Wise
Local Purchase
Loose Meat (Add Loose/Less Loose)
Animal Conversion
Sample Item production Information

Reports

Following Reports in Module

Fresh Production Daily Report
Fresh Production MIS (Date Range)
Fresh Local Purchase
Fresh Conversion Report
Fresh Other Info

Management Reports

Daily Yield Report
Monthly Yield Report
Order Vs / Packing Instruction Vs Production
Item Wise Yield Report
Bonelss Meat Calculation
Meat/Offal Prdocution Analysis
Country Wise Production Analysis
Local Purchase trend

Automation / Features

Following Automation & Features in Module

Capture Blast and Plate Freezer details in application.

Fresh Production Alerts Basd on Orders and Production Planning.

Production Planning through Packing instructions.

Packing Instruction Staus Reports

Excess Production Alerts

Production Segment
Frozen Department

Information Management

We Capture following information

Frozen production Item Wise
Frozen Department against Order and Packing Instruction

Capture Following Attributes of a FG (Finished Good)

Brand
Item Code
Packing Mode (IWP, Bulk, Packets)
Packing Pieces & Weight
Carton Weight
Country Made For
Order No (If Made Against Order)
Packing Instruction No (If made against packing instruction)
Data Entered by
Data Verfied by

Reports

Following Reports in Module

Frozen Production Daily Report
Frozen Production MIS (Date Range)
Frozen Vs Fresh Production

Management Reports

Item Wise Production percentage order vs / Packing instruction Vs Frozen Production report
Item Wise, Brand Wise, Country wise Production Graphs

Automation / Features

Following Automation & Features in Module

Barcode Based Packaging in Frozen area and Data Capturing. Facility of Serialized and Non Serailized bar Code.

Order wise Palnnign wise production alerts

Excess production alerts

Auto Deduction of Packing Material.

Production Segment
Cold Store Department

Bito Technologies

Information Management

We Capture following information

Store Capcity
Store Orientation and Storage Layout
All store Movement Transactions as mentioned below

Production entry
Shift & Transfers
Export
Repacking & Reprocessing
Adjustments (Lost, Found, Damaged, Expired)
Internal Store Movement

All Features of WMS
Storage location List
Picking List

Reports

Following Reports in Module

Stock Detail MIS
Item Ledger Report
Item Movement report
Packing /Reprocessing Report (Loss Analysis)
Store Transactions
Transaction Detail Report
Expiry Report
Store Capacity Vs Stock

Management Reports

Combined Stock Reports
Brandwise, Country Wise, Mode wise item stock status
Expired vs Non Expired Stock
Short Expiry alert
Stock Movement DSS Reports

Automation / Features

Following Automation & Features in Module

Barcode Based item movement and tracking of item location.

Auto alerts in case of Short Expiry

Auto Email of stock to Desired Email ID.

Production Segment
Dispatch Department

Bito Technologies

Information Management

We Capture following information

All Unit Movement transactions
Export Based on Loading Instructions
management of Internal Shift based on
following two types of transactions
    Single Shift
    Trip Movement (Multiple Halts)

Reports

Following Reports in Module

All Unit movement report
Export MIS
Loading Instruction Status

Management Reports

Order Vs Export
Material In Transit

Automation / Features

Following Automation & Features in Module

Barcode Based item movement and tracking of item movement out of unit.

Excess Export Alert

Data Duplication Alerts

Maker Checker system to avoid human errors.

Production Segment

Order / Export Department

Bito Technologies

Information Management

We Capture following information

All Order Punching
Release of Packing Instructions
Release of Loading instruciton
Export Planning
Export Docuemtnation

Reports

Following Reports in Module

Order MIS
Packing Instruction MIS
Loading instruction MIS
Container Wise Planning
Order Status
Production Status
Stock vs Order Status

Management Reports

Order/ Export Monthly Trend
Brand Wise Export Trend
Production Planning and Distribution
Order vs Production
Blocked Stock Analysis
Buyer wise MIS
Agent Wise MIS

Automation / Features

Following Automation & Features in Module

Excess Production Alerts

Export Docuemtnation direct generation

Order Completion Auto Alert

.

Manufaturing Unit Other Modules

Applications Gives additional information Management in Production ERP

Bito Technologies

Other Production Unit Modules
Applications

Refrigeration Department

Freezer Temperature Log Management
Maintenance Management
Department MIS Reports

Equipment Management

Facility to Manage all Equipment's of Factory
Alerts of AMC
AMC Cost Management
Equipment Expiry Management

Accessories Management

All Accessories Used in the Factory
Packing m Material Management
MIS Reports

Other Production Unit Modules
Applications

Bito Technologies

Local Sale

Facility of Local Sale management
Local Sale Item Management
Local Sale Entry Management
Local Sale MIS Reports
Party Wise sale Analysis

Certificate Management

Manage all Company Certifications
Citification Expiry Alert
Certification Document History

Item Management

Management of Brands
Management of Items
Management of Item Attributes

Other Production Unit Modules Applications

Gate Pass/Security Management

Generate Vehicle Gate Pass
Generate Visitor Gate Pass
Auto Alerts
Facility of Capturing Export Movement
Security Guard Duty Roaster
Unit Access MIS Reports

Energy & Resource Management

Tracking of Electricity Utilization by each Department and Manufacturing Unit Section
Tracking and monitoring of Labor as well as Human Resource Utilization in the complete Unit
With Combination of Purchase Department overall cost analysis can be done through ERP system.

Civil Department

Civil Department gives facility of following

Complaint Registration
Work Order Management
MB (Measurement Book) Data Entry
Abstract Formation
Final Billing Receipt Formation

Contractor Wise Report
Unit Section Wise Report
Item Wise Costing
Overall Civil Department Costing
Various MIS Departments

More Modules / Tools

Simple Tools for Large Impatcs

ERP Tools Segment
Utility Tools/ Applications

Bito Technologies

Document / Media Management

Manage all Types of Media
Manage all Type of Documents
Access Restrictions Facility
Document History Management

Communication management

Facility of Communication with individual or group of Contacts.
There will be following Five Modes of Communication
SMS / Email / Push Notifications / ERP Alerts /
Chat Application

Calendar Management

Unit Wise/Region wise Calendar Management
Mark Holidays
Mark Events & Activities
Mark Self Reminders

Entity Management

Single enterprise level module to capture all type of Organizations/ persons associated with company.

Manage all kind of Parties
Manage Contacts in Parties
Facility of Organization Type and Category Classification
Search Contact Facility

Task Management

Facility to create self as well as combined tasks. These tasks can be easily monitored and executed by this module. Helps in the management of assigning tasks.

Integrate With Other ERP Modules

Bring More productivity with single information system

ERP Other Modules
Large Scale Integrations

Bito Technologies

HR Department

HR Department Will Give Facility to Manage complete organization employment information Management.

It is further divided in the following sub modules

HR Configuration
Recruitment Management
Employee MIS
Employee Documentation
Employee Lifecycle Management
Employee Payroll Management
Employee Exit Management
Employee HR Training Management

Accounts Management

Complete Accounting Solutions and further Divided in the following sub modules

Accounts Configuration
Accounts Transactions
Cost Accounting
Accounting Reports

Why Bito Technologies

Understanding the Customer requirement and bring such flexibility that we can incorporate the minute requirements of client is our incredible strength. Which makes us different from our competitors.

Edge With
Bito Technologies

10+ Years of Experience
Team Bito has more than 10 Years of Experience in ERP Implementation and Change Managements

International Standards
Bito ERP solution is developed with international Standards and procedures to bring high performance in the Application.

24X7 Support System
You get a dedicated support team to keep your ERP application live and their should be 99.99% Uptime

Tested Application
One of the big brands of India already using the application in meat Industry.

Flexibility of Working
Based on client timings and schedule, Bito provides complete flexibility in working timings and location

Latest Technology & Security Features
Our application is developed on latest open source technologies and use security features to avoid the attempts of Hacking.

Economical Pricing
We believe in bringing High performance in very optimum ricing so now Automation will not become a burden on your organization IT Budget.
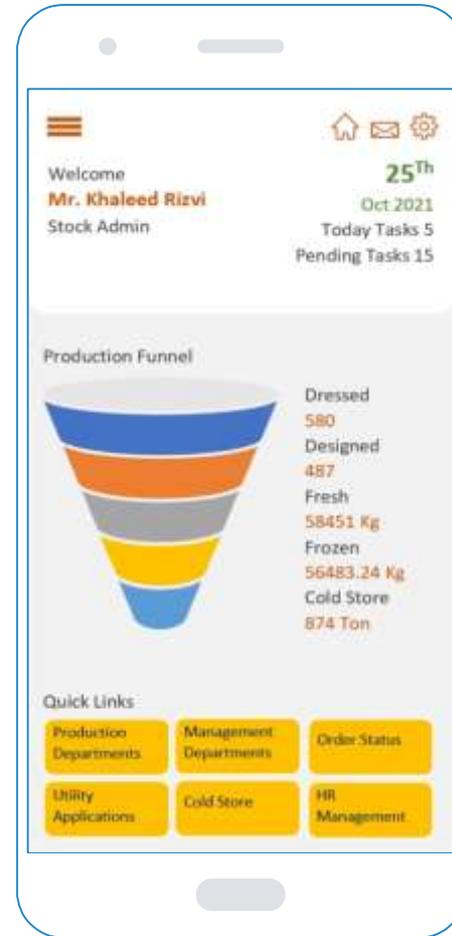

Whats More?

Besides all above mentioned features of our ERP System. It offers some features out of the box from traditional ERP Solutions.
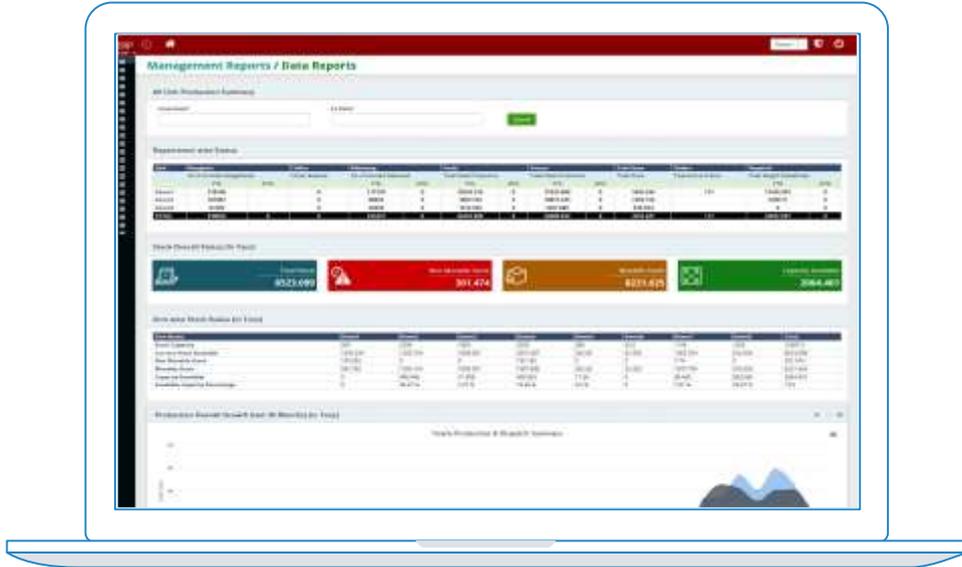

Mobility

Through our ERP V5.1.1 you get a seamless mobility where almost all crucial information is avilable on app and complete monitoring can be done through app. Besides this app become a tool to get connected with your business even when you are far from your production units.

Mobile Apps with ERP

1. Management Monitoring Android App
2. Stock Status Andorid App

One Application One Cloud Architecture

Now access your ERP synched with all applications anywhere & anytime. you get real time data always.

AI Based Alerts

Use of AI (Artifical Intelligence) gives you a wow factor where you can find auto alerts in the case of Critical breach of any function or excess utilization of resources.
